## Subject Index

**Acidity**  
 Hydrocarbons conversions over Y-zeolite used in uranium ore wastes treatment: Activity and selectivity of Y-faujasite modified by uranyl ions in the catalytic disproportionation of toluene 19

**Ad-atom**  
 Liquid phase oxidation of 1-methoxy-2-propanol with air. II. Structure and chemical properties of lead-promoted palladium catalysts 59

**Air oxidation**  
 Catalytic oxidation of hydrogen sulphide by air over activated carbon fibre 241

**Air oxidation**  
 Liquid phase oxidation of 1-methoxy-2-propanol with air. II. Structure and chemical properties of lead-promoted palladium catalysts 59

**Alkali promoters**  
 Addition of propene to carbon monoxide–hydrogen in higher alcohol synthesis over un-promoted and caesium-promoted  $ZnCrO$  catalysts 181

**Alkenes**  
 Addition of propene to carbon monoxide–hydrogen in higher alcohol synthesis over un-promoted and caesium-promoted  $ZnCrO$  catalysts 181

**Alkylation**  
 Alkylation of toluene with ethylene over H-ZSM-5 zeolites 215

**Alumina–zeolite**  
 Catalytic hydroconversion of simulated coal tars. III. Activity of sulphided NiMo alumina–zeolite catalysts for the hydroconversion of model compounds 115

**Ammoxidation**  
 Role of surface complexes on titanium-silicate in the ammoxidation of cyclohexanone with hydrogen peroxide 105

**Aromatization**  
 Influence of iridium, rhenium and lanthanum on propane aromatization over platinum/ZSM-5 catalysts 29

**Aromatization**  
 Kinetic study of n-butane aromatization on ZSM-5 and gallium bearing ZSM-5 catalysts 77

**Aromatization**  
 Parameters affecting the dispersion of the gallium phase of gallium H-MFI aromatization catalysts 249

**Barium oxide/lanthanum oxide**  
 Oxidative coupling of methane with peroxide ions over barium–lanthanum–oxygen mixed oxide 203

**Bimetallic catalysts**  
 Influence of iridium, rhenium and lanthanum on propane aromatization over platinum/ZSM-5 catalysts 29

**Bismuth promotion**  
 Liquid phase oxidation of 1-methoxy-2-propanol with air. I. Lead and bismuth promotion and deactivation of palladium catalysts 41

**Butane**  
 Kinetic study of n-butane aromatization on ZSM-5 and gallium bearing ZSM-5 catalysts 77

**Carbon fibre**  
 Catalytic oxidation of hydrogen sulphide by air over activated carbon fibre 241

**Catalyst characterisation (electrochemical measurements, STEM, XPS, XRD)**  
 Liquid phase oxidation of 1-methoxy-2-propanol with air. II. Structure and chemical properties of lead-promoted palladium catalysts 59

**Catalyst characterization (ESCA)**  
 Effect of metal-organic compounds on thiophene hydrodesulphurization over sulphided  $Co(Ni)Mo/Al_2O_3$  catalysts 191

**Catalyst preparation**  
 Role of catalysts preparation and pretreatment in the stereoselective hydrogenation of thymol 161

**Catalyst preparation (impregnation)**  
 Molybdate catalysts prepared by a novel impregnation method: Effect of citric acid as a ligand on the catalytic activities 145

**Catalyst pretreatment**  
 Role of catalysts preparation and pretreatment in the stereoselective hydrogenation of thymol 161

**Chemical properties**

Liquid phase oxidation of 1-methoxy-2-propanol with air. II. Structure and chemical properties of lead-promoted palladium catalysts 59

**Chlorine**

Influence of the presence of chlorine on the selectivity to ethane and ethene during methane coupling over samarium-based catalysts 265

**Chromia**

Radiotracers in fluorine chemistry. XV. Halogen exchange and isomerization reactions involving chlorofluoroethanes on fluorinated chromia surfaces labelled with anhydrous hydrogen [<sup>18</sup>F]-fluoride, hydrogen[<sup>36</sup>Cl]-chloride or 1,1-Di[<sup>36</sup>Cl]chlorotetrafluoroethane 89

**Citric acid**

Molybdate catalysts prepared by a novel impregnation method: Effect of citric acid as a ligand on the catalytic activities 145

**Coal tars**

Catalytic hydroconversion of simulated coal tars. III. Activity of sulphided NiMo alumina-zeolite catalysts for the hydroconversion of model compounds 115

**Cobalt–nickel–molybdenum/alumina**

Effect of metal-organic compounds on thiophene hydrodesulphurization over sulphided Co(Ni)Mo/Al<sub>2</sub>O<sub>3</sub> catalysts 191

**Cobalt/silica–alumina**

Hydrocarbon synthesis from carbon monoxide + hydrogen on impregnated cobalt catalysts. III. Cobalt (10%)/silica–alumina catalysts 167

**Coke formation**

Characterization by pulsed oxidation of coke on platinum/alumina 227

**Copper**

Selective hydrogenolysis of methyl and ethyl acetate in the gas phase on copper and supported Group VIII metal catalysts 1

**Cyclohexanone**

Role of surface complexes on titanium-silicate in the ammoximation of cyclohexanone with hydrogen peroxide 105

**Cyclohexanone oxime**

Role of surface complexes on titanium-silicate in the ammoximation of cyclohexanone with hydrogen peroxide 105

**Deactivation**

Aromatization of propane over gallium-containing H-ZSM-5 zeolites. Influence of the preparation method on the product selectivity and the catalytic stability 127

**Deactivation**

Liquid phase oxidation of 1-methoxy-2-propanol with air. I. Lead and bismuth promotion and deactivation of palladium catalysts 41

**Dysprosium oxide**

Selective oxidation of methane and ethane over Li<sup>+</sup>-MgO-Cl<sup>-</sup> catalysts promoted with metal oxides L1

**Ethane**

Selective oxidation of methane and ethane over Li<sup>+</sup>-MgO-Cl<sup>-</sup> catalysts promoted with metal oxides L1

**Ethane selective conversion**

Comments on "Selective conversion of ethane into acetaldehyde by photo-catalytic oxidation with oxygen over a supported molybdenum catalyst" 141

**Ethane selective oxidation**

Reply to "Comments on Selective conversion of ethane into acetaldehyde by photo-catalytic oxidation with oxygen over a supported molybdenum catalyst" 143

**Ethanol**

Selective hydrogenolysis of methyl and ethyl acetate in the gas phase on copper and supported Group VIII metal catalysts 1

**Ethyl acetate**

Selective hydrogenolysis of methyl and ethyl acetate in the gas phase on copper and supported Group VIII metal catalysts 1

**EXAFS**

Molybdate catalysts prepared by a novel impregnation method: Effect of citric acid as a ligand on the catalytic activities 145

**Fluorine**

Radiotracers in fluorine chemistry. XV. Halogen exchange and isomerization reactions involving chlorofluoroethanes on fluorinated chromia surfaces labelled with anhydrous hydrogen [<sup>18</sup>F]-fluoride, hydrogen[<sup>36</sup>Cl]-chloride or 1,1-Di[<sup>36</sup>Cl]chlorotetrafluoroethane 89

**Gallium**

Parameters affecting the dispersion of the gallium phase of gallium H-MFI aromatization catalysts 249

<b>Gallium oxide</b>	
Kinetic study of n-butane aromatization on ZSM-5 and gallium bearing ZSM-5 catalysts	77
<b>Gallosilicates</b>	
Aromatization of propane over gallium-containing H-ZSM-5 zeolites. Influence of the preparation method on the product selectivity and the catalytic stability	127
<b>Group VIII metal catalysts</b>	
Selective hydrogenolysis of methyl and ethyl acetate in the gas phase on copper and supported Group VIII metal catalysts	1
<b>H-(GA)ZSM-5</b>	
Aromatization of propane over gallium-containing H-ZSM-5 zeolites. Influence of the preparation method on the product selectivity and the catalytic stability	127
<b>H-ZSM-5</b>	
Alkylation of toluene with ethylene over H-ZSM-5 zeolites	215
<b>Halogen exchange</b>	
Radiotracers in fluorine chemistry. XV. Halogen exchange and isomerization reactions involving chlorofluoroethanes on fluorinated chromia surfaces labelled with anhydrous hydrogen [ <sup>18</sup> F]-fluoride, hydrogen [ <sup>36</sup> Cl]-chloride or 1,1-Di[ <sup>36</sup> Cl]chlorotetrafluoroethane	89
<b>Higher alcohol synthesis</b>	
Addition of propene to carbon monoxide-hydrogen in higher alcohol synthesis over un-promoted and caesium-promoted ZnCrO catalysts	181
<b>Hybrid catalysts</b>	
Kinetic study of n-butane aromatization on ZSM-5 and gallium bearing ZSM-5 catalysts	77
<b>Hydrocarbon synthesis</b>	
Hydrocarbon synthesis from carbon monoxide + hydrogen on impregnated cobalt catalysts. III. Cobalt (10%)/silica-alumina catalysts	167
<b>Hydrogen spillover</b>	
Kinetic study of n-butane aromatization on ZSM-5 and gallium bearing ZSM-5 catalysts	77
<b>Hydrogen sulphide</b>	
Catalytic oxidation of hydrogen sulphide by air over activated carbon fibre	241
<b>Hydrogen treatment</b>	
Parameters affecting the dispersion of the gallium phase of gallium H-MFI aromatization catalysts	249
<b>Hydrogenation</b>	
Role of catalysts preparation and pretreatment in the stereoselective hydrogenation of thymol	161
<b>Hydrogenolysis</b>	
Selective hydrogenolysis of methyl and ethyl acetate in the gas phase on copper and supported Group VIII metal catalysts	1
<b>Infrared spectroscopy</b>	
Role of surface complexes on titanium-silicate in the ammoniation of cyclohexanone with hydrogen peroxide	105
<b>Ion exchange</b>	
Hydrocarbons conversions over Y-zeolite used in uranium ore wastes treatment: Activity and selectivity of Y-faujasite modified by uranyl ions in the catalytic disproportionation of toluene	19
<b>Isomerization</b>	
Radiotracers in fluorine chemistry. XV. Halogen exchange and isomerization reactions involving chlorofluoroethanes on fluorinated chromia surfaces labelled with anhydrous hydrogen [ <sup>18</sup> F]-fluoride, hydrogen [ <sup>36</sup> Cl]-chloride or 1,1-Di[ <sup>36</sup> Cl]chlorotetrafluoroethane	89
<b>Isomorphous substitution</b>	
Aromatization of propane over gallium-containing H-ZSM-5 zeolites. Influence of the preparation method on the product selectivity and the catalytic stability	127
<b>Kinetics</b>	
Selective hydrogenolysis of methyl and ethyl acetate in the gas phase on copper and supported Group VIII metal catalysts	1
<b>Lead promotion</b>	
Liquid phase oxidation of 1-methoxy-2-propanol with air. I. Lead and bismuth promotion and deactivation of palladium catalysts	41
<b>Lead promotion</b>	
Liquid phase oxidation of 1-methoxy-2-propanol with air. II. Structure and chemical properties of lead-promoted palladium catalysts	59

<b>Lithium</b>	
Selective oxidation of methane and ethane over $\text{Li}^+ \text{-MgO-Cl}^-$ catalysts promoted with metal oxides L1	
<b>Magnesia</b>	
Selective oxidation of methane and ethane over $\text{Li}^+ \text{-MgO-Cl}^-$ catalysts promoted with metal oxides L1	
<b>Methane coupling</b>	
Influence of the presence of chlorine on the selectivity to ethane and ethene during methane coupling over samarium-based catalysts 265	
<b>Methane oxidative coupling</b>	
Oxidative coupling of methane with peroxide ions over barium-lanthanum-oxygen mixed oxide 203	
<b>Methane selective oxidation</b>	
Selective oxidation of methane and ethane over $\text{Li}^+ \text{-MgO-Cl}^-$ catalysts promoted with metal oxides L1	
<b>Methyl acetate</b>	
Selective hydrogenolysis of methyl and ethyl acetate in the gas phase on copper and supported Group VIII metal catalysts 1	
<b>Model compounds</b>	
Catalytic hydroconversion of simulated coal tars. III. Activity of sulphided NiMo alumina-zeolite catalysts for the hydroconversion of model compounds 115	
<b>Molybdate catalysts</b>	
Molybdate catalysts prepared by a novel impregnation method: Effect of citric acid as a ligand on the catalytic activities 145	
<b>Molybdenum</b>	
Catalytic hydroconversion of simulated coal tars. III. Activity of sulphided NiMo alumina-zeolite catalysts for the hydroconversion of model compounds 115	
<b>Molybdenum/silica</b>	
Comments on "Selective conversion of ethane into acetaldehyde by photo-catalytic oxidation with oxygen over a supported molybdenum catalyst" 141	
<b>Molybdenum/silica</b>	
Reply to "Comments on Selective conversion of ethane into acetaldehyde by photo-catalytic oxidation with oxygen over a supported molybdenum catalyst" 143	
<b>Nickel</b>	
Catalytic hydroconversion of simulated coal tars. III. Activity of sulphided NiMo alumina-zeolite catalysts for the hydroconversion of model compounds 115	
<b>Nickel naphthenate</b>	
Effect of metal-organic compounds on thiophene hydrodesulphurization over sulphided $\text{Co}(\text{Ni})\text{Mo}/\text{Al}_2\text{O}_3$ catalysts 191	
<b>Oxidation</b>	
Catalytic oxidation of hydrogen sulphide by air over activated carbon fibre 241	
<b>Oxidation</b>	
Liquid phase oxidation of 1-methoxy-2-propanol with air. I. Lead and bismuth promotion and deactivation of palladium catalysts 41	
<b>Oxidative coupling</b>	
Selective oxidation of methane and ethane over $\text{Li}^+ \text{-MgO-Cl}^-$ catalysts promoted with metal oxides L1	
<b>Palladium/alumina</b>	
Liquid phase oxidation of 1-methoxy-2-propanol with air. I. Lead and bismuth promotion and deactivation of palladium catalysts 41	
<b>Palladium/carbon</b>	
Liquid phase oxidation of 1-methoxy-2-propanol with air. I. Lead and bismuth promotion and deactivation of palladium catalysts 41	
<b>Palladium/carbon</b>	
Liquid phase oxidation of 1-methoxy-2-propanol with air. II. Structure and chemical properties of lead-promoted palladium catalysts 59	
<b>Peroxide ions</b>	
Oxidative coupling of methane with peroxide ions over barium-lanthanum-oxygen mixed oxide 203	
<b>Photocatalysis</b>	
Comments on "Selective conversion of ethane into acetaldehyde by photo-catalytic oxidation with oxygen over a supported molybdenum catalyst" 141	
<b>Photocatalysis</b>	
Reply to "Comments on Selective conversion of ethane into acetaldehyde by photo-catalytic oxidation with oxygen over a supported molybdenum catalyst" 143	

<b>Platinum-iridium</b>	
Influence of iridium, rhenium and lanthanum on propane aromatization over platinum/ZSM-5 catalysts	29
<b>Platinum-lanthanum</b>	
Influence of iridium, rhenium and lanthanum on propane aromatization over platinum/ZSM-5 catalysts	29
<b>Platinum-rhenium</b>	
Influence of iridium, rhenium and lanthanum on propane aromatization over platinum/ZSM-5 catalysts	29
<b>Platinum/alumina</b>	
Characterization by pulsed oxidation of coke on platinum/alumina	227
<b>Propane aromatization</b>	
Aromatization of propane over gallium-containing H-ZSM-5 zeolites. Influence of the preparation method on the product selectivity and the catalytic stability	127
<b>Propane aromatization</b>	
Influence of iridium, rhenium and lanthanum on propane aromatization over platinum/ZSM-5 catalysts	29
<b>1-methoxy-2-Propanol</b>	
Liquid phase oxidation of 1-methoxy-2-propanol with air. I. Lead and bismuth promotion and deactivation of palladium catalysts	41
<b>1-methoxy-2-Propanol</b>	
Liquid phase oxidation of 1-methoxy-2-propanol with air. II. Structure and chemical properties of lead-promoted palladium catalysts	59
<b>1-methoxy-2-Propanone</b>	
Liquid phase oxidation of 1-methoxy-2-propanol with air. I. Lead and bismuth promotion and deactivation of palladium catalysts	41
<b>Propene hydrocarbonylation</b>	
Addition of propene to carbon monoxide-hydrogen in higher alcohol synthesis over un-promoted and caesium-promoted ZnCrO catalysts	181
<b>Pulse oxidation</b>	
Characterization by pulsed oxidation of coke on platinum/alumina	227
<b>Radiotracers</b>	
Radiotracers in fluorine chemistry. XV. Halogen exchange and isomerization reactions involving chlorofluoroethanes on fluorinated chromia surfaces labelled with anhydrous hy-	
drogen [ $^{18}\text{F}$ ]-fluoride, hydrogen [ $^{36}\text{Cl}$ ]-chloride or 1,1-Di [ $^{36}\text{Cl}$ ]-chlorotetrafluoroethane	89
<b>Reforming</b>	
Characterization by pulsed oxidation of coke on platinum/alumina	227
<b>Samarium catalysts</b>	
Influence of the presence of chlorine on the selectivity to ethane and ethene during methane coupling over samarium-based catalysts	265
<b>Selectivity (ethane, ethene)</b>	
Influence of the presence of chlorine on the selectivity to ethane and ethene during methane coupling over samarium-based catalysts	265
<b>STEM analysis</b>	
Parameters affecting the dispersion of the gallium phase of gallium H-MFI aromatization catalysts	249
<b>Stereoselectivity</b>	
Role of catalysts preparation and pretreatment in the stereoselective hydrogenation of thymol	161
<b>Structural properties</b>	
Liquid phase oxidation of 1-methoxy-2-propanol with air. II. Structure and chemical properties of lead-promoted palladium catalysts	59
<b>Support effects</b>	
Characterization by pulsed oxidation of coke on platinum/alumina	227
<b>Surface structure</b>	
Liquid phase oxidation of 1-methoxy-2-propanol with air. II. Structure and chemical properties of lead-promoted palladium catalysts	59
<b>Syngas conversion</b>	
Hydrocarbon synthesis from carbon monoxide + hydrogen on impregnated cobalt catalysts. III. Cobalt (10%)/silica-alumina catalysts	167
<b>Temperature-programmed oxidation</b>	
Characterization by pulsed oxidation of coke on platinum/alumina	227
<b>Temperature-programmed reduction</b>	
Characterization by pulsed oxidation of coke on platinum/alumina	227

<b>Thermodynamics</b>	
Molybdate catalysts prepared by a novel impregnation method: Effect of citric acid as a ligand on the catalytic activities	145
<b>Thiophene hydrodesulphurization</b>	
Effect of metal-organic compounds on thiophene hydrodesulphurization over sulphided Co(Ni)Mo/Al <sub>2</sub> O <sub>3</sub> catalysts	191
<b>Thymol</b>	
Role of catalysts preparation and pretreatment in the stereoselective hydrogenation of thymol	161
<b>Titanium-silicalite</b>	
Role of surface complexes on titanium-silicalite in the ammoximation of cyclohexanone with hydrogen peroxide	105
<b>Toluene</b>	
Alkylation of toluene with ethylene over H-ZSM-5 zeolites	215
<b>Toluene disproportionation</b>	
Hydrocarbons conversions over Y-zeolite used in uranium ore wastes treatment: Activity and selectivity of Y-faujasite modified by uranyl ions in the catalytic disproportionation of toluene	19
<b>Uranyl ions</b>	
Hydrocarbons conversions over Y-zeolite used in uranium ore wastes treatment: Activity and selectivity of Y-faujasite modified by uranyl ions in the catalytic disproportionation of toluene	19
<b>Vanadium naphthenate</b>	
Effect of metal-organic compounds on thiophene hydrodesulphurization over sulphided Co(Ni)Mo/Al <sub>2</sub> O <sub>3</sub> catalysts	191
<b>Xylene isomerization</b>	
Hydrocarbons conversions over Y-zeolite used in uranium ore wastes treatment: Activity and selectivity of Y-faujasite modified by uranyl ions in the catalytic disproportionation of toluene	19
<b>Y faujasites</b>	
Hydrocarbons conversions over Y-zeolite used in uranium ore wastes treatment: Activity and selectivity of Y-faujasite modified by uranyl ions in the catalytic disproportionation of toluene	19
<b>Zeolites</b>	
Aromatization of propane over gallium-containing H-ZSM-5 zeolites. Influence of the preparation method on the product selectivity and the catalytic stability	127
<b>Zeolites</b>	
Influence of iridium, rhenium and lanthanum on propane aromatization over platinum/ZSM-5 catalysts	29
<b>Zeolites</b>	
Kinetic study of n-butane aromatization on ZSM-5 and gallium bearing ZSM-5 catalysts	77
<b>Zeolites</b>	
Hydrocarbons conversions over Y-zeolite used in uranium ore wastes treatment: Activity and selectivity of Y-faujasite modified by uranyl ions in the catalytic disproportionation of toluene	19
<b>Zeolites</b>	
Alkylation of toluene with ethylene over H-ZSM-5 zeolites	215
<b>Zeolites (H-MFI)</b>	
Parameters affecting the dispersion of the gallium phase of gallium H-MFI aromatization catalysts	249
<b>ZSM-5</b>	
Influence of iridium, rhenium and lanthanum on propane aromatization over platinum/ZSM-5 catalysts	29
<b>ZSM-5</b>	
Kinetic study of n-butane aromatization on ZSM-5 and gallium bearing ZSM-5 catalysts	77
